

Animation Guide

Motion that feels like magic, never noise

01 Principles

Why motion matters

Three principles

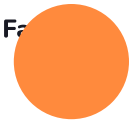

Purposeful, fast, joyful

Pu ful

Every animation explains something: where the coins went, what unlocked, what changed. If it adds no meaning, remove it.

Fa

UI motion stays under 350ms. Celebrations may reach 750ms but only for a reason.

Jo

Springs and bounce give earned moments life. Confetti rewards success instead of decorating defaults.

02 Duration & Curves

The tempo of the app

Durations

Seven reference speeds

Instant	50ms	Hover, press feedback
Fast	150ms	Icon changes, toggles
Normal	250ms	Card entrances, transitions
Gentle	350ms	Dialogs, sheets
Slow	500ms	Large containers
Extra	750ms	Celebrations, confetti

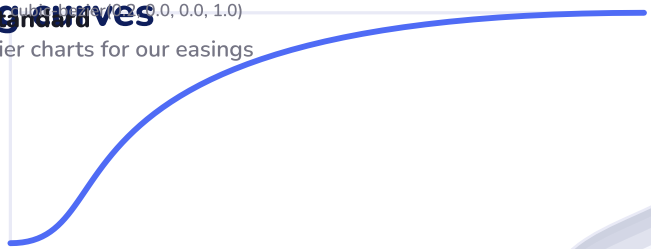

Easing curves

Cubic-bezier charts for our easings

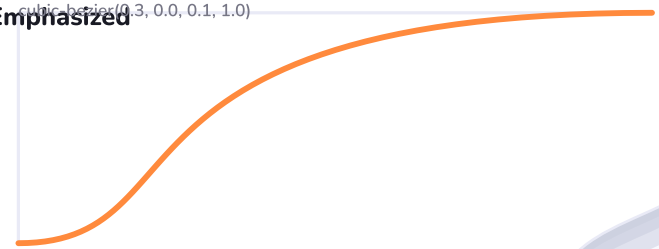

Standard

cubic-bezier(0.2, 0.0, 0.0, 1.0)

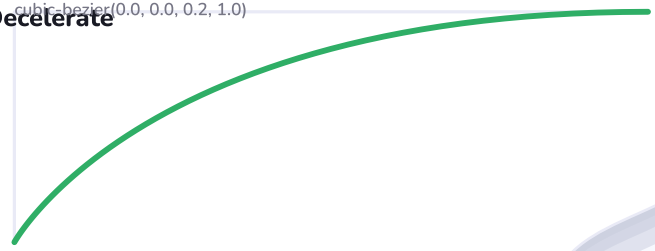

Emphasized

cubic-bezier(0.3, 0.0, 0.1, 1.0)

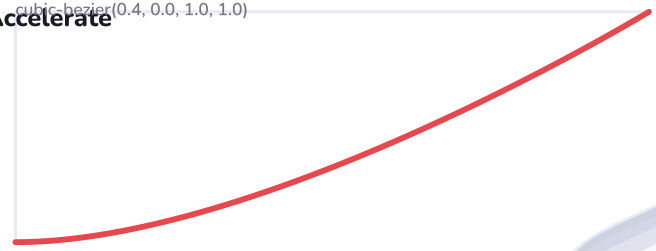

Decelerate

cubic-bezier(0.0, 0.0, 0.2, 1.0)

Accelerate

cubic-bezier(0.4, 0.0, 1.0, 1.0)

03 Micro-interactions

The details users feel

Signature moments

Specified for implementation

- Coin fly: coin pops at task card, arcs to the header balance, then the total counts up over 450ms with a bounce.
- Check draw: the check mark draws itself over 500ms while the card pulses green; a coin flies immediately after.
- Confetti: bursts from the task card on completion; particles fall and rotate for 750ms with the standard curve.
- Badge unlock: the badge scales 0 to 1 with a golden glow ring over 600ms bounce.
- Reward claim: card lifts, confetti at the top, then a check stamp appears for 500ms.
- Tab switch: content cross-fades 250ms while the active pill slides under the destination.

04 Loading & Celebration

Worth waiting for

Loading patterns

Never a frozen frame

Spinner coin

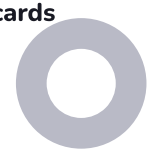

A coin spins with a soft pulse, 1000ms

Bouncing dots

Three dots bounce in sequence under any

Skeleton cards

Rounded bars shimmer at 8% opacity

Celebration levels

Match the moment

Sma tion

Coin pop +5 on every completed task

Med ration

Badge unlock banner with glow ring

Larg tion

Full confetti + toast for 7-day streaks

Respect “reduce motion”: swap springs and confetti for simple cross-fades and no motion.

05

Reference Table

Every animation token

Animation tokens

Name · duration · curve · behaviour

Animation	ms	Curve	Behaviour
splash	900	decelerate	Sunny spins in with a glowing halo; logo
welcome	500	emphasized	Hero illustration rises with cards fadin
card_entrance	300	emphasized	Cards translate up 24px and fade, stagge
coin_fly	450	bounce	Coin pops at source, arcs to the balance
confetti	750	standard	Confetti burst from task card; particles
badge_unlock	600	bounce	Badge scales from 0 to 1 with golden glo
reward_claim	500	bounce	Reward card lifts, confetti at top, chec
button_ripple	350	standard	Ripple expands from touch point and fade
task_complete	500	bounce	Check mark draws itself; card pulses gre
progress	900	decelerate	Ring stroke animates from 0 to value wit
loading	1000	standard	Three bouncing dots or a spinning coin w
screen_transition	300	emphasized	Fade-through with 8% horizontal slide be
hero	400	emphasized	Card image morphs and flies to its desti
tab_switch	250	standard	Content cross-fades while the indicator
