07 Dialogs, Snackbars & Empty

From the component boards

Dialogs, Snackbars & Empty States

Transient and contextual feedback

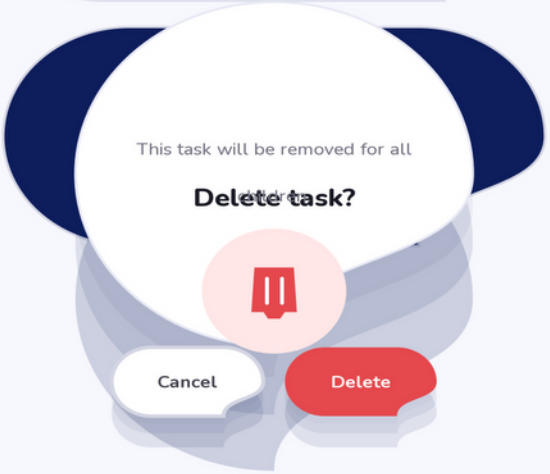

Component

Level-3 elevation, centred on screen.

Transient feedback with action.

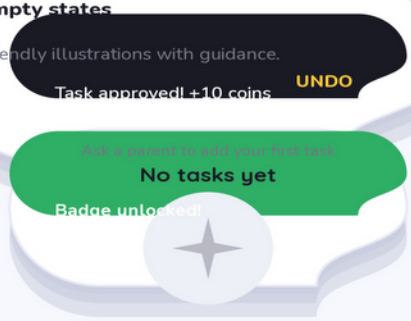

Tooltip & toasts

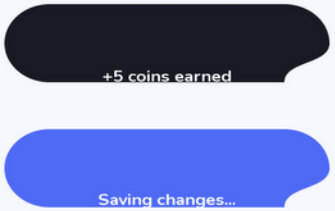

Micro-feedback.

Empty states

Friendly illustrations with guidance.

08 Mascot & Icons

From the component boards

Avatars, Mascot & Empty Illustration

Identity visuals across modes

Component

Avatar details

Colourful initials with optional ring.

Background tints

Neutral but warm colours.

Icon set

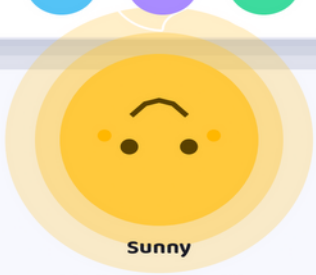

48 custom glyphs, 2px stroke feel.

M K L A N

Sunny mascot

Primary brand illustration.

M M M M M

Sunny

Greets, celebrates, guides

D P D P

Illustration styles

Soft shapes, no harsh strokes.

09

Typography Scale

From the component boards

Component

Typography Scale

Baloo 2 for display, Quicksand for child UI, Nunito for everything else

Display Large	240	Hero numbers
Display Medium	Good job!	Screen heroes
Headline Large	My Tasks	Dashboard
Headline Small	Weekly rewards	Cards
Title Large	Family Dashboard	Parent screens
Title Medium	Manage Children	List titles
Body Large	Turn chores into playful tasks.	Body
Body Medium	Parents stay in control.	Secondary
Label Large	APPROVE TASK	Buttons
Stat Large	240	Big numbers

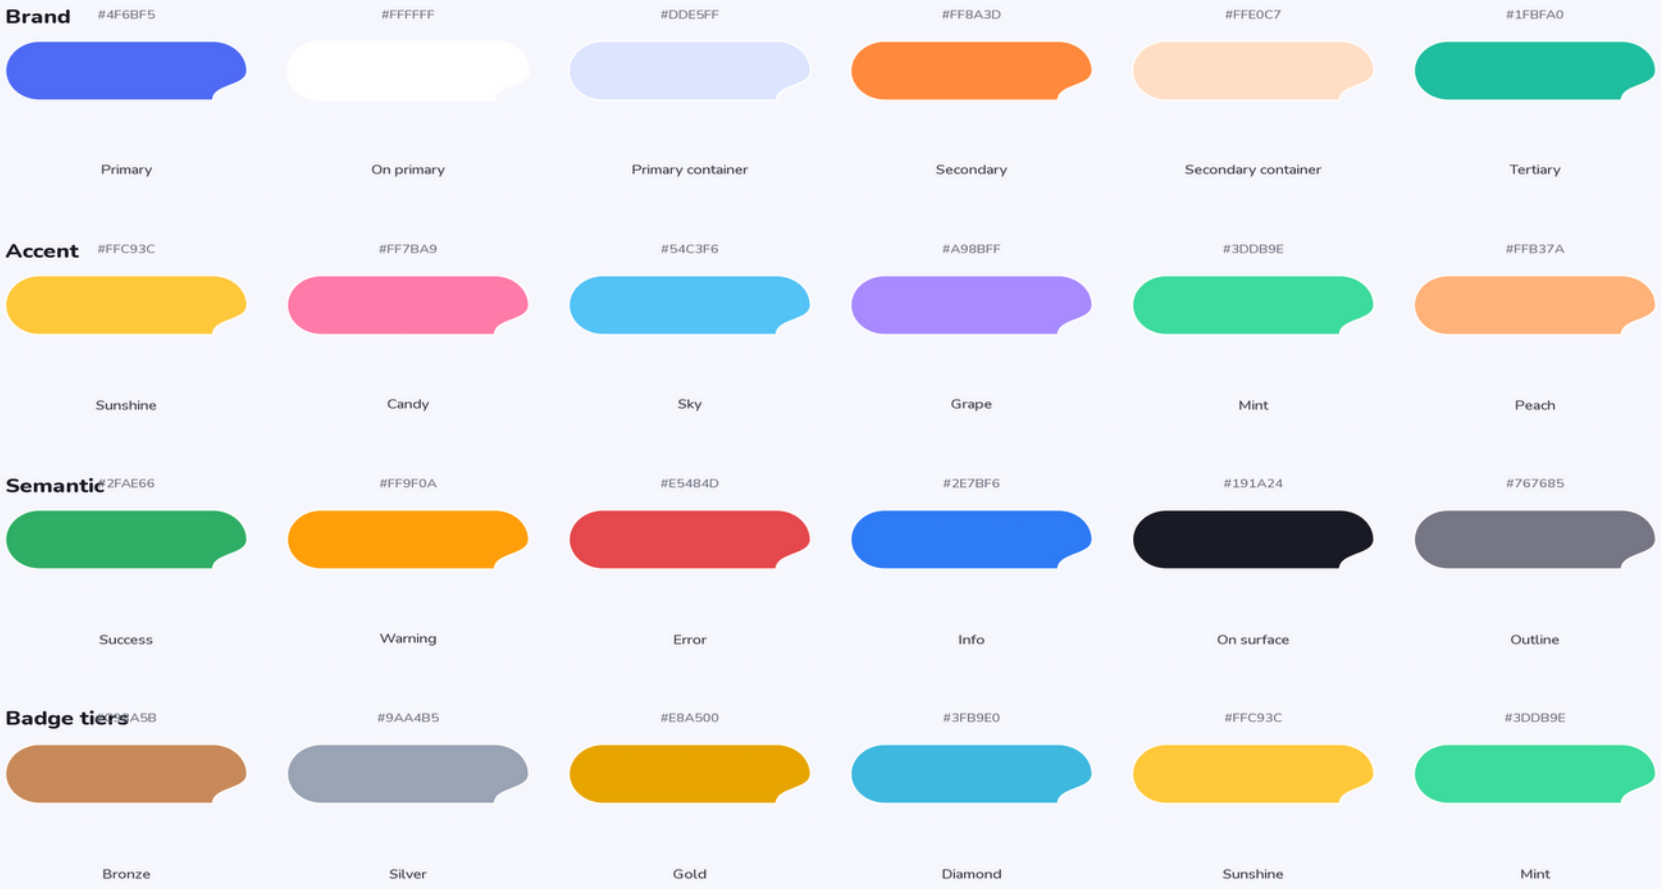

Quicksand numbers render in tabular figures for balanced totals.

Color Palette
From the component boards

Component

Colour Palette
Light theme brand, accent, semantic and badge colours

Colours are used for feedback and joy, never for data alone.

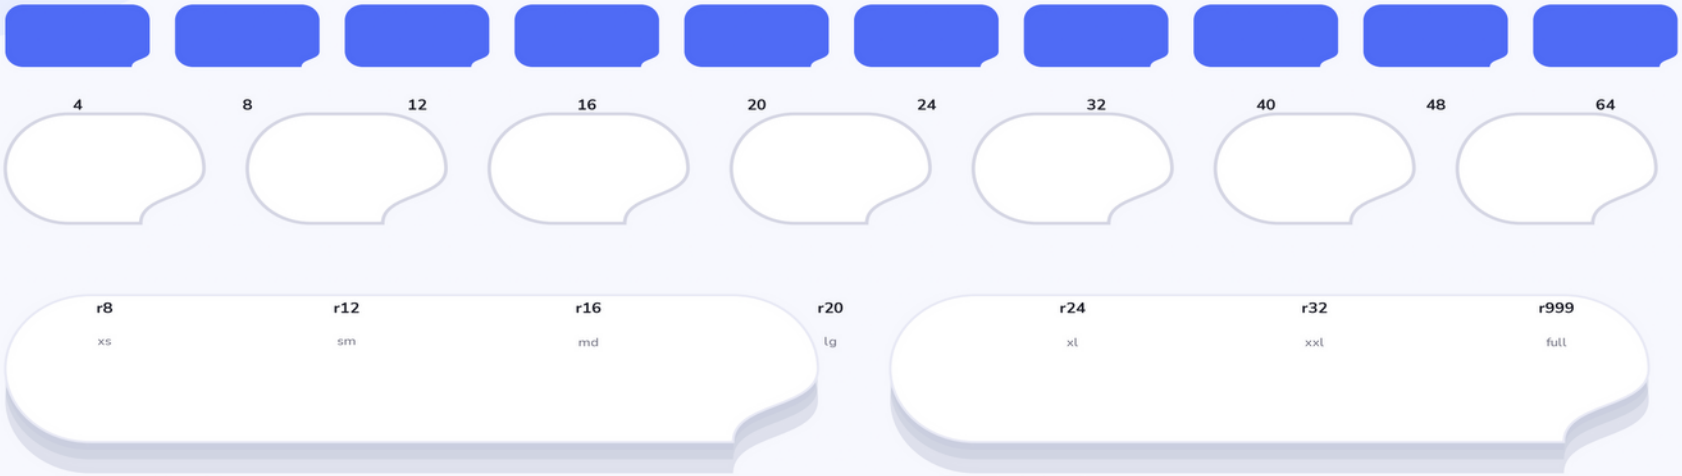

11 Spacing & Layout

From the component boards

Component

Spacing & Layout
8dp grid, corner radii, elevation and touch targets

Screen padding 24

Card padding 20 · Grid gap 16 · Touch target min 48dp

Content max width 880dp on expanded layouts

Targets & density

Buttons 48dp high · icon targets 44dp · list rows 56dp

Bottom nav 80dp · app bar 64dp

Layout tokens

Compact < 600dp

Medium 600-840dp

Expanded > 840dp

Implementation checklist

When you build a screen

- Every card uses a component, never a bespoke rectangle.
- Buttons are 48dp high with 16dp radius; FABs are 56dp.
- Statuses use the six-state palette with icon + label.
- Coin chips show numbers in Quicksand tabular figures.
- Touch targets are 48dp, spacing follows the 8dp grid.
- Dark mode swaps to the DARK token set automatically.
