

Typography Guide

Baloo 2, Quicksand and Nunito working together

01

Three Roles

Three families, one voice

The family system

Why three fonts

Baloo 2

Display & headlines

Round, friendly, high-energy. Reserved for child-mode heroes, greetings and big numbers. Weights 700–800.

Quicksand

Child UI & numerals

Soft geometric with wide, open letters. Used for task names, buttons and coin totals in child mode.

Nunito

Body & parent UI

Highly readable at small sizes. All body text, labels, parent screens, tables and data. Weights 400–800.

02

The Type Scale

Ten sizes, three families

Full scale

Name · family · size/line · weight

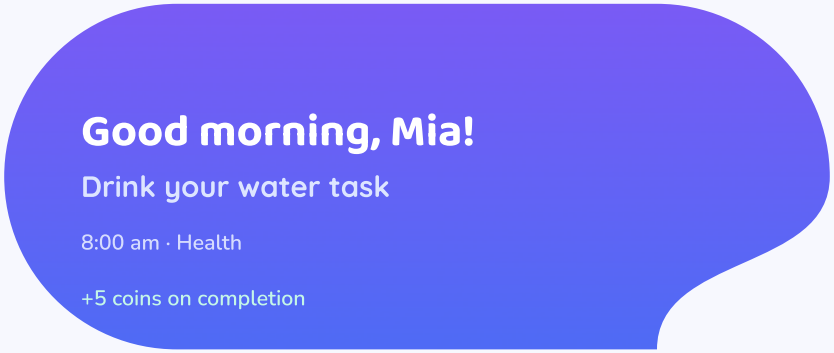

Display Large	240	57/60 · Baloo
Display Medium	Great!	45/48 · Baloo
Display Small	Coins	36/40 · Baloo
Headline Large	My Tasks	32/36 · Baloo
Headline Medium	Rewards	28/32 · Baloo
Headline Small	Badge earned	24/28 · Baloo
Title Large	Family Dashboard	22/26 · Nunito
Title Medium	Manage Children	16/24 · Nunito
Title Small	Sample	14/20 · Nunito
Body Large	Turn chores into fun.	16/24 · Nunito

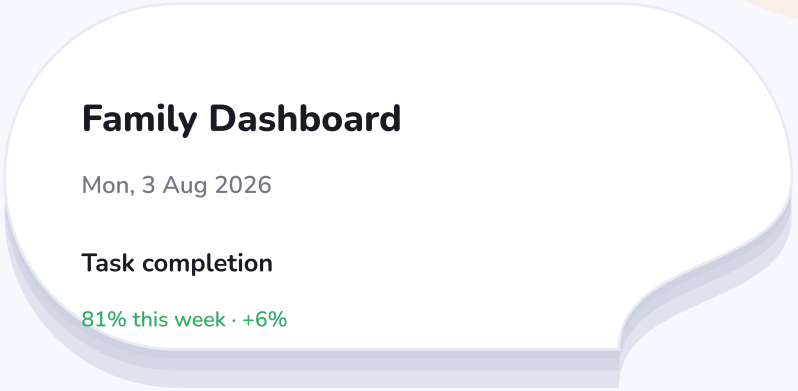

03 Hierarchy in Use

Headlines that lead, captions that follow

Child vs parent mode

Different voices, same hierarchy logic

Child mode leads with Baloo 2 headlines in the header gradient; parent mode leads with Nunito titles on white. Body and captions share the same

04 Numbers & Totals

Coin counts need rhythm

Tabular figures

Stable totals, no jitter

Coin balance

240

Weekly total

1,042

Quicksand tabular numerals

All numeric totals use Quicksand for child mode and Nunito for parent mode, with tabular figures enabled so counts line up in lists and leaderboards.

05 Good practice

Rules that keep text legible

Do & don’t

Typography hygiene

Use sentence case everywhere – this is a friendly app.

Truncate with ellipses; never let text overflow cards.

Keep line length under 66 characters for body text.

Don’t use ALL CAPS outside buttons and chips.

Don’t mix more than two families on one screen.

Don’t scale display type below 24dp – it becomes mud.
